

Enviro Dynamics Civil, and our subsidiary business Inspector Drains, are professionals and aim to please. We specialise in Drainage Investigations, Repairs and Replacements.

We are one of a handful of contractors approved to be on the EQC Drainage Assessment Panel, so we work closely with the EQC on your claim. We are Certified CCTV Operators and Certified Drainlayers. Experienced Christchurch Drainlayers are few and far between, we provide efficient and professional services with the added flare of the good ol' kiwi culture!

Not only do we have some of the best Drainlayers in Christchurch but we also have qualified Civil Engineering Professionals and Civil Project Managers with extensive residential, subdivision, commercial and Civil Drainage experience.

So rest assured that you are receiving a qualified and educated service.

ABOUT US

WE WILL REPAIR / REPLACE
YOUR EARTHQUAKE
DAMAGED DRAINS

We have the latest in CCTV gear (drain camera and unblocking equipment) and we are Certified CCTV Operators.

As an EQC Drainage Assessment Panel Member we undertake CCTV investigations and reporting directly for the EQC, we also do this for SCIRT and private property owners.

There are different options of reports we provide. But ultimately we report in writing and provide visual evidence (CCTV footage) on the current status of your Storm Water Pipes and/or your Sewer Pipes, and if you will need to have these repaired.

We are Certified and Christchurch City Council approved Drainlayers. We can work anywhere in Canterbury.

We can unblock, repair and replace any drains at your home, business or workplace. We also provide drainage utility services for New homes and developments!

We also provide Pipe Bursting services. We can Pipe Burst new sewer or stormwater pipes in place of your old damaged pipes. This means there is no need to excavate long trenches through your property to put in drain pipes.

We have substantial resources to undertake drainage projects and siteworks of all sizes and complexity; Including foundations, construction siteworks and earthworks, land remediation, ground engineering, soil stabilisation, etc.

So be sure to contact us regardless of the project size you need completed.
